

Information Technology Sector

ADISOFTech

A D I Softech South Africa is a technology company founded in 2004 that has developed a comprehensive Consulting portfolio into a fast growing, energetic business consultancy providing professional consulting services to both public and private sector clients. We comprise a highly skilled and dedicated team with extensive experience gained locally and internationally. Our mission is to help our clients optimise their strategy and operational potential, manage change, deliver results, and accelerate success.

Here are the key areas we specialize in:

- Providing expertise in **open-source technologies**, leveraging these tools to enhance software development.
- Creating **mobile and web applications/products** for our clients.
- Offering services to recover projects that have slipped in schedule or incurred significant costs.
- Providing **quality assurance** services, ensuring software meets high standards.
- Conducting **quality audits** to assess and improve existing processes.
- Our consulting services include **architecture and solutions design**.
- Fine-tuning development processes to enhance efficiency and competency.

Our company has an annual turnover of approximately R10 million for F.Y 23-24 and employs 20 highly skilled professionals. We have a presence in Gauteng and KZN, ensuring that we can meet the needs of our clients throughout these regions.

In summary, A D I Softech South Africa aims to improve software development competency, efficiency, and quality through a holistic approach that includes consulting, recruitment, and training.

A D I Softech South Africa is led by Mr. Kishore Katireddi, a highly qualified and resourceful Project Delivery and Enterprise/Solutions Architecture professional with a career spanning twenty-seven years across Manufacturing, Logistics, Banking, Insurance and Government, in multiple geographies including South Africa, Belgium, USA, and India.
