SYNCHPLUS CONSULTING

SynchPlus Consulting is a software resources and application outsourcing service provider with an industry existence of more than 15 years here in South Africa. At Synchplus, we excel in design & development of custom software solutions and assist customers in their design, development, integration and maintenance software requirements. Being technically sound it is natural that we can understand clients' resources requirement better than others conventional resourcing vendors and providing highly skilled and most suitable Software professionals with niche skills.

Synchplus operates under a global delivery model, thus offering a suitable and cost effective development and deployment of services across a wide range of software intensive business needs such as Banking, Insurance, Engineering and services automation etc.

Currently, we have strength of around 20 people, based in Gauteng SA, Bangalore, Pune and Hyderabad India. We serve few of the World leaders in diverse domains such as physical security & access controls in USA, and Lifestyle and wellness behaviour platform here in SA and state-of-the-art Municipality modernization projects in SA. We also work with health and safety management software for some big Mining giants in India. In Synchplus we are super proud to have developed Mobile application for Apple platform for one of the youngest digital banks in South Africa. In terms of quantifiable numbers, we are about R10M in turnover and expect at least R15M-R20M this coming year 2024-2025.

Synchplus is found & led by director, Mr. Yogesh Kumar, having a unique mix of technical and management skills with over 30 years' experience in the working in the software development companies in diverse domains.
