

Mining & Metals Sector

A AND B GLOBAL MINING

A and B Global Mining (ABGM) is a leading niche mining consultancy certified with ISO 9001:2015 standards, operating across South Africa, India, and the UAE. Established in 2006 in South Africa, we deliver world-class technical services to multi-commodity clients worldwide. Over the past 18 years, ABGM has successfully completed 500+ projects in 30+ countries, conducting comprehensive studies on 20+ commodities. Our commitment to operational excellence, safety, and sustainability has positioned us as a trusted mining technical partner.

Our consultancy services encompass Mineral Exploration & Resource Management, Geotechnical Modelling & Design, Hydrogeology & Hydrology, Environmental & Social, Underground and Surface Mine Design & Optimisation, Life-of-Mine Planning & Scheduling, Clean & Green Energy Solutions, Strategic Corporate & Investment Advisory, Technical Audits, Productivity Analysis & Optimisation, Technical & Economic Feasibility Studies, Digitalisation & Automation, and End-to-End Project Management & Development.

Currently, ABGM has a team of 50+ employees across South Africa, India, and the UAE. Our business trajectory reflects exponential growth in revenue, global presence, employee count, client base, and social media visibility.

In the fiscal year ending Mar 2024, our South Africa unit alone achieved an annual turnover of approximately R 61 million. Our vision is to be the preferred mining partner globally, guided by core values of honesty, trust, respect, and pursuit of excellence. We are committed to delivering quality services that surpass client expectations.

ABGM South Africa is led by Managing Director, Mr. Devendra Vyas, a seasoned mining engineer with 20+ years of expertise in geological modelling, mining engineering, strategic mine planning, due diligence, and project management. Mr. Vyas is a Competent/Qualified Person for Mineral Resources in various commodities, contributing significantly to optimising business profitability and strategic mining projects worldwide. His extensive international experience spans more than 25 countries, leveraging leading-edge mining technologies for mine planning, design, and scheduling.
