

## Mining & Metals Sector

# MATTER INVESTMENTS

Matter Investments is a South African registered independent company incorporated and run under the leadership of Mr. Arnav Jhunjhunwala. Matter Investments deals in Mining and Washing of Chrome Ore and in the import and export of various commodities such as Ferrous and Non- Ferrous scrap metals, Steel, Rice and FMCG's. The biggest contribution in terms of volume and revenue being Chrome ore.

We have grown at a rapid pace and have managed to create a niche in the market developing strategic business relationships and work culture, which is dictated by a very young team who believe in sheer hard work.

We have secured long term commitments from our buyers and suppliers in order to grow exponentially yet sustainably. This has enabled us to build a stable and sustainable company which is expanding both horizontally (into different product categories) and vertically (backward integration).

We have a widespread presence in Southern Africa supplying directly to and from South Africa, Zimbabwe, South America and South-East Asian countries. We staff over 200 employees in Southern Africa and the current revenue is ZAR 4.2 Billion.

Mr. Arnav Jhunjhunwala, Managing Director, holds professional qualifications comprising a BSc Honors in Business Administration from the University of Bath, UK and is a registered BRP in South Africa. He has a working experience in Southern Africa of over 14 years.
