ION EXCHANGE SAFIC

Ion Exchange Safic (Pty) Ltd is a joint venture between “Ion Exchange India Ltd”, a pioneer water and wastewater treatment company for the last six decades; and “Safic Pty Ltd”, a local South African company in the field of cleaning solutions, involved in manufacturing sanitation chemicals and represents top international companies for cleaning equipment for industry, institutions and for home, for the last four decades.

Range of products include water, waste water treatment and recycling plants using various technologies for settling – clarification, filtration, disinfection and treatment using membranes and ion exchange process. The company manufactures a wide range of ion exchange resins in Gujarat; RO/UF/Nano membranes in Goa; Flocculants for water and non-water processes; Boiler, Cooling water & fireside treatment chemicals, in Andhra Pradesh. In Bangalore and in Goa it's membranes and water treatment plants. The customer services division undertakes modification and rehabilitation of existing plants through process modification to augment capacity and improve treated water quality, making the equipment more cost effective by use of the latest treatment techniques.

Ion Exchange has over 14 operations worldwide and provides water and environmental solutions to Food and Beverage, Paper Mills, Refinery, Steel Plants, Thermal & Nuclear Power Plants. The Home Water Solution (HWS) group has a wide range of water purifiers for home, institutions and to communities. The company has designed and built Seawater Reverse Osmosis plants and large Brackish water Plants in Africa beside Asia Pacific and Middle East countries.

Ion Exchange Safic is one of the Top 5 water treatment companies in South Africa and the business has grown by an average of 30 % YTY since inception. The company currently has 10 employees that focus on the sales and services to the SADC region and is supported by 25 employees across the administration, finance and warehouse departments. The business also enjoys the support of channel partners, with their own sales and support staff, to drive sales of the Ion Exchange Safic product ranges across the various regions. The company's head office is situated in Johannesburg with a regional office in Kwa-Zulu Natal. The current focus is to start local manufacturing of certain of the chemical product ranges in South Africa and to increase exports to Africa.

Ion Exchange Safic is headed by our CEO & Executive Director, Mr. Gourish Chakravorty. Mr. Chakravorty holds a Master's degree in Physical Chemistry from Delhi University. He is a Professional Natural Scientist and member in Advisory Board in University of Pretoria, Dept of Chemical Engineering & EBIT, has over three decades of experience in this field.
